

# NCS Aurora P1 Port Replicator

The Aurora P1 Port Replicator is specifically designed to work with the Aurora 410A, Aurora 420, Aurora 511A and Aurora 521A Notebooks. Not only does the Port Replicator keep you mobile—when you are on the go, convenient one-step detachment saves you time (as opposed to disconnecting from multiple devices each and every time) and reduces wear and tear on Notebook ports. Note that the individual replicator ports will only work if those particular features are native to your Laptop.

## COMPATIBLE WITH THE FOLLOWING LAPTOPS

**Aurora 410A**

**Aurora 420A**

**Aurora 511A**

**Aurora 521A**
