NCS LOGISTICS CONTRIBUTE TO EFFORTLESS DEPLOYMENTS:

Seamless and Secure Journey: From the moment you place your order, your equipment embarks on a securely managed journey. Our facility safeguards your assets with secure storage for both NCS-supplied equipment and Customer Furnished Equipment (CFE). Meticulous inventory management ensures everything is precisely accounted for, providing complete peace of mind.

Tailored Shipping: Our team collaborates with you to create a customized shipping strategy that meets your specific needs and budget. We understand that a one-size-fits-all approach doesn't work for logistics, so we utilize our strong connections with independent carriers and established Third-Party Logistics (3PL) partners to provide a wide range of options for domestic and international shipping. Whether you prefer large scale operation or the white-glove service of a trusted 3PL partner, NCS guarantees door-to-door delivery, ensuring that your equipment reaches its intended destination. Our specialized offerings include fully assembled rack shipments, crating, armed security, and dangerous goods certification.

White Glove Delivery: We understand that some deliveries require an extra layer of customer service. Working with preferred 3PL partners, we offer white-glove services. We deliver on your schedule with drivers that have undergone background checks - when required. We can also unpack the shipment and remove trash from your premises.

POWERING EFFICIENCY AND DELIVERING PEACE OF MIND.

A LOGISTICS POWERHOUSE

Effortless deployments start in our state-of-the-art logistics center. Our massive 108,000 square foot facility houses a 45,000 sq ft warehouse boasting an impressive 1400+ pallet capacity. With an additional 25,000 sq ft of readily available overflow space, we can efficiently manage even the most extensive deployments. A climate-controlled environment ensures optimal storage conditions, and the daily processing capacity exceeds 500 pallets, showcasing our ability to handle high volumes with efficiency.

SECURITY IS PARAMOUNT

NCS prioritizes security at every stage. Our facility adheres to strict CMMC and ITAR regulations and holds multiple ISO certifications for quality, environmental management, and security. This commitment to comprehensive security translates to unmatched efficiency and peace of mind. Access is controlled and restricted to U.S. Persons only. The facility is also under 24/7 monitoring and surveillance. With periodic DCMA audits, you can rest assured that your valuable IT assets are being handled to your requirements.

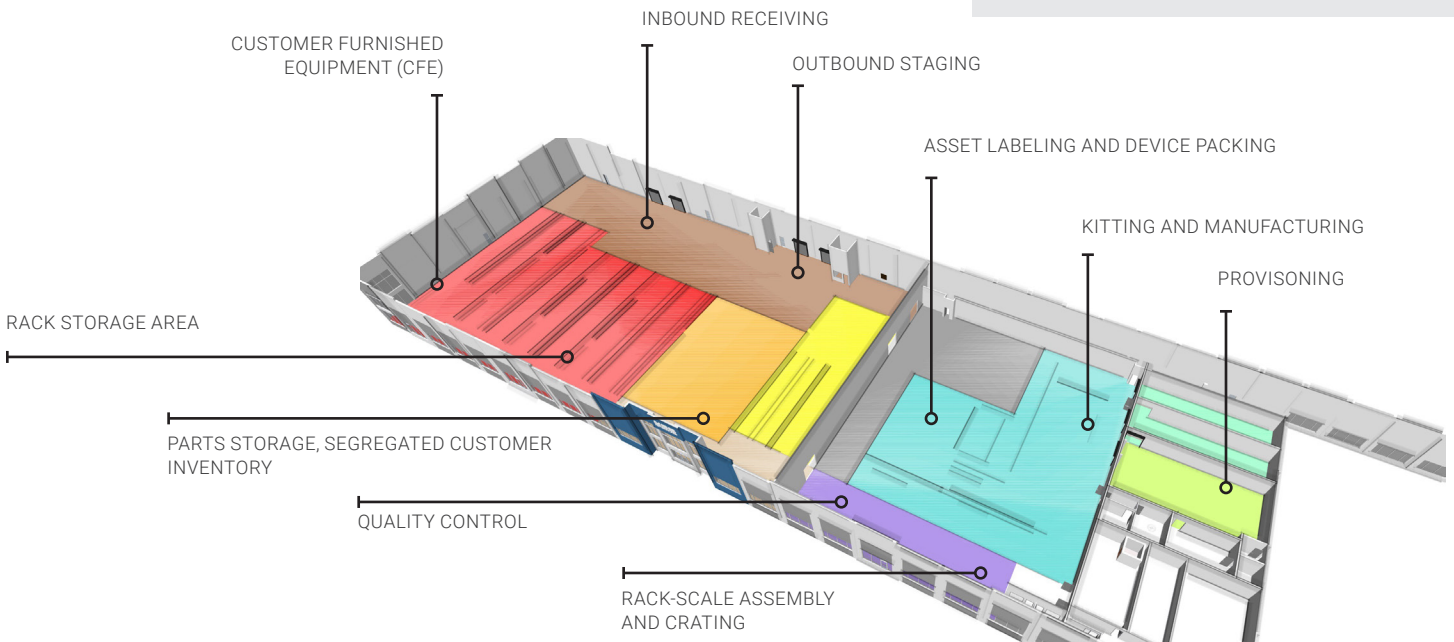

THE NCS DIFFERENCE

Quality and Security

NCS operates under strict quality and security management policies (CMMC, ISO 9001, 14001, 28000) and tightly controls facility access for ITAR-compliant work.

Warranty Support

We can enhance your OEM warranty to include a spare parts pool, segregation of customer provided parts inventory, accidental damage coverage, extended terms, and 24/7 call support.
