

WORKFORCE SOLUTIONS

Streamlining solutions to meet the demands of today's mobile workforce

CORPORATE OVERVIEW

1996

Established in Virginia

Manassas, VA

Headquarters

108,000 sqft

Secure State-of-the-Art Facility

Expertise

Design, Engineering,
Integration, Manufacturing,
Logistics, and 3D Printing

Geographically dispersed teams often require computing devices that are both lightweight and durable to withstand field conditions. Our solutions provide the digital tools necessary for organizations to foster collaboration among remote teams, enabling efficient communication and teamwork regardless of distance.

processes to deliver customized, cost-effective technology solutions that perform flawlessly in any environment.

From simple transportable units for indoor use to ruggedized systems built to withstand the harshest conditions on land, sea, or in the air, NCS engineers deliver solutions that perfectly fit your unique needs. Minimizing failure rates in the field, improving efficiency, and providing unwavering support for your digital demands are the NCS advantages.

Solutions for every environment

THE POWER OF A HOLISTIC APPROACH

Our in-house teams of engineers (electrical, mechanical, software), and product managers collaborate seamlessly to deliver secure and reliable systems for use in any environment. As a Specialized Systems Integrator, we leverage our long-standing OEM partnerships to minimize deployment delays and utilize valuable insights into product lifecycle information. This holistic approach delivers cost-effective, custom solutions that meet your exact requirements.

NCS offers a one-stop shop for your IT needs. Our expert teams design, manufacture, and support custom solutions, from concept to post-delivery. Operating from our innovative state-of-the-art facility, we utilize our semi-automated production line, integration services, environmental testing lab, and 3D printers for custom solutions tailored to your unique goals.

A LOGISTICS POWERHOUSE

Effortless deployments start in our logistics center. Our massive 108,000 square foot facility houses a 45,000 sq ft warehouse with an impressive 1400+ pallet capacity. An additional 25,000 sq ft of readily available overflow space, allows us to efficiently manage even the most extensive deployments. A climate-controlled environment ensures optimal storage conditions, and the daily processing capacity exceeds 500 pallets, showcasing our ability to handle high volumes with efficiency.

BEYOND THE SALE

Not all computing needs can be met with simple off-the-shelf purchases. We offer pre- and post-purchase services to streamline technology integration.

Our Specialized Systems Integration services ensure your organization receives the solution that matches your needs. We can deliver computing and printing products configured with hardware and software that are specific to your organization.

Additionally, we support your equipment post-purchase with our warranty support services. You can have peace of mind knowing that our OEM-trained and certified technicians can service your equipment with genuine original manufacturers' parts.

THE NCS DIFFERENCE

Quality and Security

NCS operates under strict quality and security management policies (CMMC, ISO 9001, 14001, 28000) and tightly controls facility access for ITAR-compliant work.

Warranty Support

We can enhance your OEM warranty to include a spare parts pool, segregation of customer provided parts inventory, accidental damage coverage, extended terms, and 24/7 call support.
